## My Journey

BY SHAURYA SHRESTHA

GRADE 6

My journey at Euro School Chhauni began from playgroup. On the first day, when I entered the school it was a very welcoming environment. The teachers welcomed me with a smile and took me to the class. I got to learn many new things through pictures and various activities which made learning fun. After I was promoted from euro senior to grade 1, I was very excited. A lot of things were new - we were getting a new classroom, we were also getting to study new subjects, we had to wear uniforms. It was a different experience. I always looked forward to going to school as I would get excited to learn new things there. My teachers have always helped me when I have had any difficulty with any subjects. Some of the best moments in Euro School Chhauni were when I was in grade 3, my poem "Nepal" was published in Muna Patrika. Then, when I was in grade 5, I was elected as the assistant head boy of the school. I was excited when the teacher announced my name for the assistant head boy. This year, I became the "Star of the month" for the month of October 2020. It made me believe in myself even more. I am very grateful to get such supportive, helpful and caring teachers who have helped me in achieving excellence in both academics and extracurricular activities.

# EURO TIMES!

## PRINCIPAL'S MESSAGE

### Rohini Pradhan

Two quick questions for all the parents - Do you ever wonder why your child is getting more aggressive day by day? Do you think you are handling your child well enough to make him/her disciplined?

Many parents do not know that their children are missing out on a number of things (more so now, in these times when they are spending most of their time at home) because parents are not aware of the strategies related to good parenting. Most of us are trying to earn a lot more than we are currently earning and assume that money will help us in buying all the happiness and the type of education we want to give to our children.

This does not happen because children acquire abilities to become responsible, caring citizens of the society initially from the parents or the members in the family they are intensely involved with. Here are some suggestions I'd like to make:

#### Learn About Your Child

Understanding your child a little better and how they're going to develop and grow can help you prepare for how you're going to deal with them through all of these changes.

#### Learn About Yourself

Understanding yourself is another crucial aspect of raising your child. You'll find out more about your strengths and weaknesses and how your own childhood may have impacted you.

#### Learn to Work Together (Father and Mother)

It is very important to learn how to work together as parents. You need to present a united front to your child, and you need to support each other. That means not going out of your way to undermine one another or to be the 'better parent' or the 'fun parent' while leaving your partner with all of the 'household chores.' If you aren't working together, your child will notice and may begin acting out because of it.

#### Learn About Discipline

Understanding how to properly discipline your child is important and learning what styles of discipline you do and don't like is also crucial. After all, you want to make sure that you're consistent with discipline once they're old enough to understand it. Teaching them one method and then changing your mind doesn't work so well unless you learn that one type of discipline doesn't work for your child. It's best to look at the different methods, such as grounding, writing, or timeouts before your child is old enough to need them.

#### Learn to Work Through Problems

You want your child to be strong enough to work through and accomplish anything, which means you need to know how to support them in their endeavors. You need to know how you're going to work with them when things get tough and help them understand that they can and will get through it.

#### **Some quick tips too:-**

Focus on Positive Reinforcement

Make Sure to Spend Time With Your Child

Don't Project Your Problems on Your Children

Set routines

# LITERATURE FESTIVAL

Literature is simply defined as the books and any other written works especially those considered to have creative or artistic values. It is very important for the kids as it helps them to improve their creativity, writing and reading skills. Not only that it also helps to express their individual feelings towards the author. So what could be more interesting than a "Literature Festival" held by the school itself. Starting from 11th of Oct till 13th of Oct 2020 (25th - 27th Asoj) our school Euro School, Chhauni held a three day Literature Festival, which was a great achievement for us. All the students and the teachers were excited during the festival. Students from all the classes participated in various activities according to their level and instructions given by their teachers. Dramas, debates, and free writing competitions were some activities done by the upper classes.

Talking about class 1, as they are small they had various other activity related to their age. We selected few activities to involve the students for this festival which was loved by all. The students of class 1 enjoyed the whole festival with different activities like:

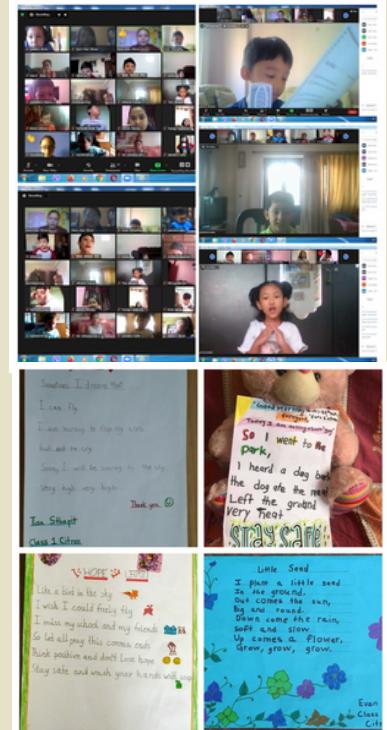

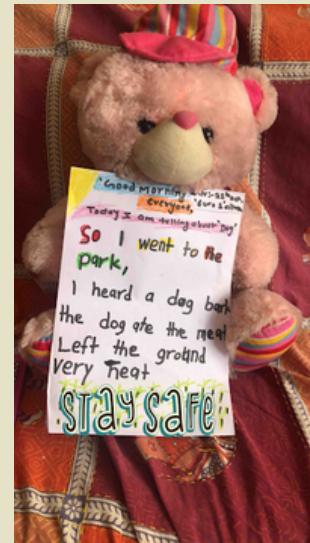

## Poem recitation both in Nepali (in Dashain) and English

For Nepali, they recited a sweet poem on the title "Dashain" created by their Nepali teacher. She taught them how to recite a poem. The kids followed her and recited the poem. The students prepared a four lined poem for English using simple rhyming words by themselves and recited in the online classes. The kids were given free topics to create poems. It was such a lovely time as they poured their thoughts and feelings in the poem. Some talked about their hobbies, some expressed their feelings towards the current situation which was really heartwarming. Some of them recited poems related to silly little things that made them laugh which indeed made us laugh as well.

## Free speaking

The most interesting part was free speaking. The kids were given any three free topics on the spot to speak in Nepali. The topics were chosen by their Nepali teacher and she selected topics which were already studied in their class. They had to say at least 3-5 sentences on the given topic. The kids found this activity a little new as it was their first time doing it. But still they gave their best while explaining it.

## Storytelling

For story telling activity they had created certain crafts and drawing related to the characters to their story. They explained the story in their own language along with the crafts they had created, which was really nice. Not only they told the story, also described the moral behind the story. This clearly showed us how enthusiastic they were for the activity. After finishing one's story they carefully listened to their friend's story, which they found really interesting. The whole activity was full of surprises as they narrated the stories in their own way.

## Introduction to National and International famous poets

Here, the kids studied various national and international poets searching through web browsers and search engines. Madhav P Ghimire, Laxmi P Devkota, William Shakespeare etc were few names of the poets which they searched. They got to know more about the poets starting from their childhood to adulthood. They also pointed out the famous creations written by these poets and talked within their friends in the class. It was really interesting.

## Stone work play

Last but not least this activity was the most awaited by the kids as it was full of creativity, imagination, color, drawing and many more. They had collected stones beforehand and started creating the structures they like the most. They even colored the stones and drew the same structures in their copy as well. They explained the things they were creating. They really loved this activity as they love playing with colors. It was full of excitement.

Talking about the grade 2, kids really enjoyed those three days of Literature Festival. They learned new ways to express their feelings. They even shared about the learned activities through different platforms. Not only kids learned many things but we teachers also learned many things from our kids. They were all excited about the event, which taught many new information about literature and how it can be expressed. Our kids as well we teachers got golden opportunity to learn new things from our guest speakers who were invited during those days. We had different activities among which some are mentioned here:

## Read Aloud – Guest Miss Shilu Karmacharya

The first and foremost activity to start our Literature Festival was the interaction with the guest speaker. She was Miss Sheelu Karmacharya who is writer of Childrens' book. She shared her experience on how she started to write the books and inspired our kids to write their own story. Kids really enjoyed the session.

## Free writing in English

The next activity was to enhance the writing skills of our kids. Three topics were given to the kids where certain criteria were discussed before they could start their free writing. The topics were about "Myself", "My School" and "My Family".

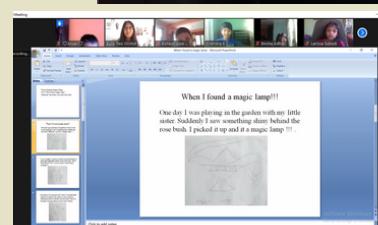

## Poem recitation in Nepali

Kids really enjoyed this activity as they all got the chance to recite the poem. They recited the poem really nicely with their own unique rhythm. The poem was given to them by their Nepali teacher. addition to this, they even shared their own created poem.

## Creating a story using PowerPoint and giving a presentation

The most waited activity by kids was creating the story. They needed to create the story in PowerPoint beforehand and presented in the class. Some of the glimpse of the story created by kids

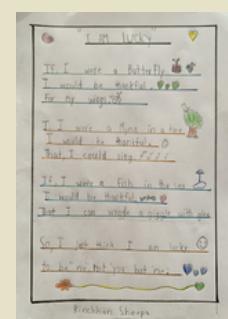

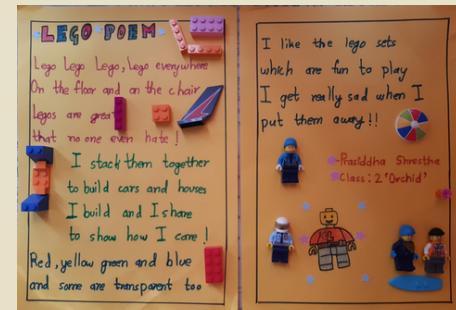

## Free writing in Nepali

Reading and writing comes in hand and hand. As reading enhances their vocabulary, writing enhances their creativity. So our another activity free writing in Nepali. Our kids were given four topics among which they needed to write about the one topic.

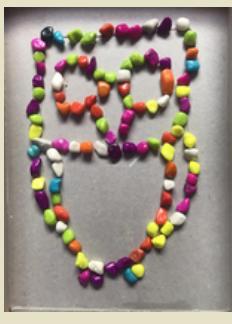

## Poem Recitation in English which was prepared by themselves

This activity helped kids to enhance their creativity and imagination skill as they got chance to create the poem themselves. They recited the poem flawlessly in front of everyone.

## Stone Work Play

This activity was full of creativity, imagination, fun and much more. Kids were asked to create the stonework which they had to explain in the class. They were excited to share their story about the stone work which they created. They showed enthusiasm and learned to express their story without any hesitation.

## Writing the biography of the writer or the poet

During this activity kids were given the names of five different famous writers or the poets and the students need to find the information regarding their birth date, death date, place where he/she was born and about their famous writings.

Talking about the grade 3, our children learned new ideas to express their feelings and shared them as well. All the children along with teachers were excited about the event, which not only was fun and interesting but also taught many new information about literature. It was a 3 day programme, many guest speakers were invited and children got a golden opportunity to learn directly from those personalities.

Many literary works and activities like poetry, story writing, free writing on any topic given by the teachers, stone work play, character design, debate etc. were performed by students.

Here are the detail information about the activities done by grade 3 (Manang and Mustang)

### Guest speaker - Debu Luitel (Poem writing and creativity)

On this day, the guest speaker was Miss Debu Luitel, who is a poet and a writer of many children's books. Not only that, she is also a teacher at SOS school. Children were actively participating in creating poems. They also shared with us, which was so nice. In a short span of time, they were able to make poems. It demonstrates that these children are really amazing and talented. Here are some photos of children engaged listening to her and sharing during this session with Miss Devu

## Creating a story using STORYBOARD or TOONY TOOL

Children using digital technology like storyboards and toony tools to make their stories. Storyboard is a visual representation of a film sequence and breaks down the action into individual panels. Toony Tool is an online cartoon, comic and meme creator. Users can design their cartoons, comics and memes using the images, characters and props provided on the website, or they can use their own images.

### Miss Prabha Bhattacharai (Read aloud about the poems)

On this day, the guest speaker was Miss Prabha Bhattacharai, who is a poet and a writer of many children's books. Not only that, she is also a Vice Principal of Padmakanya Campus, T.U. Children had fun listening to her stories and poems and also shared their poems. Children were excited during the read aloud session with her which was so interesting and informative for the children.

## Stonework Play

Stonework Play is a form of creative learning and is an open ended response to the invitation to work with stones, a natural resource. It engages the senses and animates imagination, allowing each person to tell a story or make a unique pattern suggested by handling the stones.

## Literature Festival

by Sujata Bogati

-Lead Teacher  
(Euro Senior  
Ladybug)

The two-day "Literature Festival" which was scheduled on the 26th and 27th of Ashwin was all about literature. The fest was attuned with stories, creativity, imagination, and illustrations at its best authored and presented by our children. Literature Festival was the combination of the activities that included a booklet show, picture talks, and illustrations. The idea of the literature festival was to engage and involve children in the power and magic of literature so that they could express and share their creative writing in the best way. They tried to recite the poem along with their parents creating a beautiful memory and creating a good bonding. The story that they created themselves and narrated beautifully was heartwarming and beautiful. They presented themselves as a confident and proud storyteller. They even introduced their favorite toy and share its joy and memorabilia through their words. The children were given the freedom to express their words that they heartily and beautifully morphed into memorable pieces that shined throughout the literature festival. Words are a really powerful tool that was expressed magnificently by our children. The two-day festival saw active involvement of children in their respective tasks exceeding our expectations with a beautiful memory that we all could cherish forever. All in all the literature festival was a great success

## Debate in a topic "Technology: Boon or Curse"

Debate is a formal discussion on a particular matter in a public meeting or legislative assembly, in which opposing arguments are put forward and which usually ends with a vote. Students enjoyed discussion speaking against their opposing team. They were told to get ready and given a certain time to speak. It was a lively activity where students can upgrade their speaking skill.

## Designing Favourite Character

In this activity, students have to design their all time favorite character that they have either seen in a movie or read in any book. They had presented their creation and shared it. I felt so proud after seeing their creativity. They were wonderful. Evidences of their awesomeness are :

# HOLISTIC ONLINE EDUCATION

By SHWETA SHAHI

We proudly say that we have started a Holistic Online Education method which focuses on preparing students to meet any challenges they may face in life and in their academic career. The most important theories behind holistic education are learning about oneself, developing health relationships and positive social behaviors, social and emotional development, resilience, and the ability to view beauty, experience transcendence, and truth.

As we are facing a pandemic situation due to this coronavirus, but we believe that education cannot be stopped in any kind of situation. We believe that our Euro Team has worked really hard day and night to provide advanced education to our loving students online.

Online education is new for our students but is a flexible instructional delivery system that encompasses any kind of learning that takes place via the Internet. Online learning platforms have given us an opportunity to reach students and start online courses to support students to read and learn new things at their own pace.

We started with one online class per day and now have multiple classes. Our teachers as well as our students, both have worked really hard to come this far and learn so much from online classes. Although the situation has been really difficult and unexpected, we have overcome the situation and found the alternative for continuing our education.

We started our curriculum and our ECA too. Students have learnt a lot through online and they have won competitions as well. We have successfully organized spelling contests, art competitions, and many other activities. These kinds of activities will motivate our students to do much better in upcoming days. We have introduced the star of the month from this year. Each class will have a star of the month on the basis of certain criteria. There are a lot of new concepts and new techniques that we will be starting in days to come.

## APPRECIATION FROM PARENTS

During this global crisis of Covid 19, pandemic all are suffering, be it business, education, economic , tourism sectors. However, Euro School Chhauni has pursued online classes for the students. I remember, it was one fine day in April 2020, we were very excited but worried whether our child would be able to take up the class with existing internet and network problems. Kudos to the teachers who facilitated very well and now the child is accustomed to the technology and has become a computer wizkid. Besides this frequent extra and co-curricular activities are playing vital roles in their personal development. The internal group discussions session in the breakout room forges stronger bonds and friendship among the students thus respecting the team ethos. Brainstorming sessions with the guest experts ( viz Ms. Mannsi Agarwal, Mr. Ashutosh Pradhan) were crème de la crème. These sessions definitely increased the happiness quotient. All the teachers are at their best despite the time and internet constraints. To be frank, I used to be with my child during classes and I enjoyed learning some basic details during Nepali and computer classes. Last but not the least, we would like to extend our heartfelt thanks to the untiring efforts of the respected principal of the school and entire ESC family. The online classes have been truly a great success and I hope the school will keep the momentum going!! Thank you.

Er. Suraj Manandhar  
P/o Master Sargat Manandhar, Class Six.

# TEACHER'S WORDS

मिति २०७७ साल असोज २५, २६ र २७ गते युरो स्कुल छाउनीले सञ्चालन गरेको साहित्यिक उत्सवमा नेपाली विषयका लागि स्रोत व्यक्तिका रूपमा नेपाली साहित्यका विभिन्न संषाहरूलाई आमन्त्रण गरी विद्यार्थीहरूको सिर्जनात्मक क्षमताको विकास र साहित्यिक जिज्ञासाहरूमा थप ऊर्जा मिलोस् भन्ने अभिप्रायका साथ हामीले सबदो प्रयास गरेका छौं ।

स्रोत व्यक्तिका रूपमा कवि प्रा.डा. ध्रुब घिमिरे, कवयित्री प्रभा भट्टराई, देबु लुइँटेल, कथाकार तथा कथा वाचक श्री कृष्णदीप सिंग्देल र सुधा ओझा जस्ता संषाहरूबाट विद्यार्थीहरूलाई कविता, कथा, निबन्ध लगायत विभिन्न विधाको जानकारीका साथै लेखन र वाचन सिपको लागि आवश्यक पृष्ठपोषण दिइयो । विद्यालयले गर्ने हरेक क्रियाकलापहरूमा अभिभावकहरूको साथ र सहयोगका लागि युरो स्कुल छाउनी सदैव आभारी छ ।

धन्यवाद !

-MISS TARA KC(NEPALI HOD)

Students created the poems on their own. Poems of different topics like Student's Dashain, Rainbow, Pokemon, Online classes etc were recited by the students. Students were really happy to share their creations. Students also did free speaking challenges. Some of them have prepared speeches and some delivered their speech on the spot. They were fearless to present their experiences, learnings and memorable moments in the challenge. All of the students got the opportunity to present something in the poem recitation and free speaking day.

THE POEMS

# VIRTUAL ACTIVITIES

## RED DAY BY EMA SHRESTHA -LEAD TEACHER (EURO PLAYGROUP)

Red is the colour of blood and fire, which is associated with meanings of love, passion, desire, heat, joy, strength, leadership, courage, and determination. Therefore, it is an emotionally intense colour. It is a highly visible colour that can focus attention quickly. so, children are easily attracted to this colour and love this colour. The Red day is one of the major activities conducted every year at Euro Kids Chhauni. Because of the importance of red colour in human life, the concept of red colour is provided to children by conducting different activities like sorting, colouring, painting and matching. Along with these activities, to introduce Red colour this celebration plays a vital role in children's learning. The red day was celebrated on Friday, July 24, 2020, creating Red environment all around. Wearing beautiful red attire by the children brought a charm to the event. In the first activity items related to red objects were displayed. The objects like a red pillow, cushion, flowers, bags, red toys, red utensils, red fruits were displayed. Children excitedly showcased their displayed red objects, named them and shared about the items as per their level of understanding. The second activity was named as "Hidden Treasure" in which children had to search for red objects kept inside a box. They were all curious to search the red objects. They were enthusiastically showed the hidden object and it was indeed a proud moment for them. They have been able to acquired recognition, identification skills of red objects from their surroundings. They have been able to show, name and explain the objects to their level, which enhanced their expressing and communication skills along with leadership skills. As the title of the event "Red Day," itself carries feelings of joy, fun, love, excitement, the participation of children added cherry on the top. The coordination of parent for arranging the time and necessary materials needed to conduct the event. So overall, the event was a huge success with parents and teachers teamwork to reach for children's learning and happiness.

## MAGIC SHOW BY PUJA SINGH

The magic show was fun and exciting for children was organized by the teachers of Euro Juniors, after intense practice and rehearsal. Children's day is celebrated annually to honor children and on a special day, teachers organized the magic show with different tricks and illusions to entertain the children with easily available resources. The name of some tricks used by teachers are multiplying coins, disappearing coins, magic tubes, vanishing toothpick, rubber tricks, magical rainfall, blowing balloon, candle tricks, magical paper. Children enjoy the vent to the fullest. The popular trick among all was the magical paper, magical rainfall, disappearing coin, and multiplying coins. It was a successful event that happened even though it was done virtually. They enjoyed all the tricks and couldn't take their eyes off the show. We always look for ways to make the event memorable and enjoyable to the maximum and our intention of organizing the show to see the smile on children's faces was accomplished. Magic shows always have an irresistible charm for kids of all ages. Some glimpse of the Magic show:

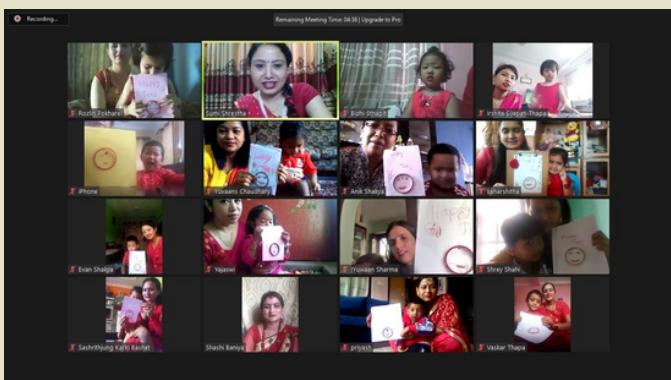

## Teej Celebration

BY SHARMILA DANGOL)  
-LEAD TEACHER (EURO  
NURSERY)

Teej is the festival that is celebrated by all the Nepali Hindu women all across the world which is also named as 'Hartalika Teej'. It is celebrated in monsoon season primarily by girls and women by singing songs, dancing, dressing up, decorating palm with henna, wearing a red saree and jewelry. Teej is dedicated to goddess Parvati and her reunion with Lord Shiva. Goddess Parvati is also known as Teej Mata. To keep our culture and tradition alive we used to celebrate this festival with fun and excitement at school every year, however this year due to this pandemic situation, We conducted the event virtually. We were overwhelmed to see our children as well as parents all dressed up in red attire and ready to celebrate with us. The interesting part of this event was "Makeover" where children were asked to put the makeup on their mother's face. Parents too cherished the moment with their children. Children also made greeting cards for their mothers with little help. Dancing on Nepali folk songs by everyone was super fun and entertaining for all of us. Listening to the story and knowing the reason behind Teej celebration was an amazing experience. The virtual Teej celebration turned out to be unexpectedly so enjoyable. We have been very fortunate to have such supportive parents and children who work together without any hesitation to make every event a great success.

## SOME IMAGE OF CELEBRATION WITH OUR LOVELY STUDENTS

Children's day celebration with our lovely students. They had created beautiful creations. They had worked really hard for making these sweet art pieces.

Peace is a concept of societal friendship and harmony in the absence of hostility and violence. In the international day of peace, moment of silence for 1 min was created to remember those heroes who gave their lives to secure peace, those who are still fighting for it and those who suffer in wait for it. After that, we everyone chanted a peace song "Light a candle for peace". Students were energized by doing art and craft activities by making different symbols of peace in their own colorful way. We could see the bright smile on the face of our students after they completed their work. The day was full of excitement and enthusiasm.. 😊

Teacher and student working together and creating the symbol of peace. While creating the symbol, students learn the true meaning of peace.

# Make the Habit of Reading

BY RASMILA MANANDHAR  
-LEAD TEACHER(EURO THREE MANANG)

## Why is reading important for us?

Developing reading skills is very essential for us in our lives. Reading habit not only improves our word power but also builds confidence in us. Reading is extremely important for all of us, which benefits us in many ways. There's a saying by J.K. Rowling, "I do believe that something very magical can happen when you read a good book." Truely, reading generates creativity and imaginative skills among the readers. It is said that the people who read books are much more calm and visionary. When we start reading a book, it controls our pain, removes stress and takes us to a different magical world. Furthermore, it not only boosts reading quality and fluency but also promotes empathy. Empathy is the capability to understand the feelings of another so that readers can give good suggestions to the people. Likewise, readers are the good leaders, the one who reads After knowing the successful path of reading habits, we can follow different methods of encouraging reading culture, through which we can cultivate a lifetime reading habit. In today's context, being natural and self-reliant is key towards success.

Therefore, start reading books and boost your quality. Learn to make good connections with books and enjoy reading books !!!

## Bonuses of Reading

### Habit:

Good communication skill  
Promotes empathy  
Foster brain development  
Enhance confidence level  
Control in anger, pain and stress

## Methods to

### Cultivate Reading Habit

:

Plan a routine of reading

Replace books instead of TV and internet

Choose your book yourself to read

Develop friendship among books

Take a break after each book

# USE OF EMERGING TECHNOLOGY AND ITS IMPACT ON THE CLASS

By JYOTI SHAH  
-LEAD TEACHER (EURO  
SENIOR HONEYBEE)

The Covid -19 ( Coronavirus) has resulted in schools shut all across the world. Globally, over a billion children are out of the classroom. As a result, education has changed dramatically and the only solution is distance learning which is possible through online classes.

Schools are using video conferencing platforms like zoom. Initially, we thought virtual classes are not our “cup of tea”, we are putting extra effort to engage students in a class. Teaching students using zoom is different but not difficult. Zoom has great features like raising hands, whiteboard, reaction buttons, polls, breakout rooms, etc. Today's generation is heavily dependent on gadgets and getting them to use these features is not an issue.

Using emerging technology we are trying to find new ideas, materials and methods to engage students in classes by revamping online peer discussions, interesting and interactive contents. Keeping up with emerging technology trends can have a major impact on the way education.

To reinvent education system we revive quiz culture, practical life lessons, games, dancing, singing, exploration of their painting, padlet which help them to put their views, whiteboard.fi, lots of hands-on activities, a celebration of every festival, puppet shows, virtual field trips, ECA activities, videos of related topics etc where technology can act as a facilitator by bringing innovation in a virtual class.

We are very happy to announce that using emerging technology no matter what the situation is and will be in days to come, children are enjoying each and every moment of their childhood.

SOME OF THE GLIMPSE OF USING EMERGING TECHNOLOGY DURING THIS PANDEMIC PHASE
